-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 20, 22-26, 28, 29 and 31-40 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 20, 22-26, 28, 29 and 31-40 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some \* c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 22 and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 22 and 23 are dependent on cancelled claim

21. The scope of the claims can not be determined.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 20, 24-25, and 31-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Karlsson et al. US Patent Application Publication 2001/0034512.

As to claims 20 and 33, Karlsson teaches a disposable diaper 1 and by the structure, a method for making, the disposable diaper suitable for incontinent care, the diaper comprising: a main diaper section having a front region 5, a rear region 6, and a crotch region 7 disposed between said front region and said rear region, said main diaper section also having an absorption body 4 for liquids and closing means 10 disposed at a first longitudinal end thereof, proximate said front region or said rear

region; and a hip belt 9 formed from a single piece material section and joined onto said main diaper section, said hip belt defining a diaper hip opening which closes in a peripheral direction, said hip belt structured for opening and closing onto itself at at least one location, said hip belt folded onto itself along folding lines 13 extending in a longitudinal direction on both sides of a middle axis thereof, wherein said closing means can be secured to said hip belt in a detachable fashion in such a manner that a user, with said hip belt applied, lifts said main diaper section upwardly between the legs to attach a free longitudinal end of said main diaper section to said hip belt in a detachable fashion.

As to claims 24 and 25, the single piece material section 9 is folded onto itself on each side of a longitudinal middle axis of the diaper, about at least two respective fold lines 13 (Figure 3).

As to claim 27, wherein, in a folded configuration, a grasping region 9' at each of two free ends of said single piece material section protrudes in a transverse direction past a longitudinal side edge of said main diaper section (Figure 3).

As to claims 30-32 and 36, the single piece material section 9 is attached in a permanent manner to an outer side of said main section (paragraph 0016).

As to claim 34, see Figures 3 and 4.

As to claims 35-40, the partial sections of the flat material web are attached to each other in a detachable fashion and glue is introduced onto the flat material web in such a fashion that it is spaced apart, in a longitudinal direction, from an edge of the subsequently separated material section and the glue is introduced onto the flat material web in cycles(paragraph 0022).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 26, 28, and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Karlsson et al. US Patent Application Publication 2001/0034512. Karlsson discloses the

present inventions substantially as claimed. Karlsson does not teach the claimed extension of the grasping section or hip belt. However, Karlsson does teach the belt portions are long enough to extend around the waist of the wearer and folded and arranged so that they can easily be accessed by a user even when lying down (paragraph 0005). Thus, Karlsson obviously teaches some length and extension of the belt portions. In *Gardner v. TEC Systems, Inc.*, 725 F.2d 1338, 220 USPQ 777 (Fed. Cir. 1984), *cert. denied*, 469 U.S. 830, 225 USPQ 232 (1984), the Federal Circuit held that, where the only difference between the prior art and the claims was a recitation of relative dimensions of the claimed device and a device having the claimed relative dimensions would not perform differently than the prior art device, the claimed device was not patentably distinct from the prior art device.
